Cab Finishes Guide

First impressions last,
so we give you choices.

thyssenkrupp

Beauty. Variety.

Sustainability.

Whether the goal is making a strong first impression or simply beautifying the elevator system, thyssenkrupp offers a complete line of elevator interiors to choose from. Customers can pick the color and finish of their choice to create appealing designs. By personalizing their elevators, they can stay true to the building's aesthetics.

Beyond simply creating attractive interiors, our products feature environmentally conscious options that support your efforts to "go green." thyssenkrupp offers elevator interiors that are free from wood products containing urea formaldehyde, utilize powder coating instead of solvent-based paint, and are third-party validated as low-emitting by Underwriters Laboratories (UL). We are the only elevator company that can say this.

Powder coats

Pictured above: Blue Patina (F-130)

Powder coat is a durable, scratch-resistant yet environmentally preferable alternative to solvent-based paint. It is free from volatile organic compounds (VOCs) and creates less waste. It can be easily recycled and requires less energy to cure. It also provides protection from UV fading and has a lifetime of 10+ years.
